

Series

Common designation IEC (NEMA) designation

- **HS** Induction motors
- **HSMS** Synchronous Motors

Available with the following enclosures:

W	Force ventilated, Weather Protected Type II (for outdoor installation)	WP II	IP 24	IC 06
CR	Force ventilated, Totally Enclosed Water-to-Air Cooled (with heat exchanger)	TEWAC	IP 44	IC 86W
CB	Force ventilated, Totally Enclosed Force (or Pipe) Ventilating (blowers by others)	TEFV or TEPV	IP 44 to ducts	IC 37

- Table applies to Horizontal machines on variable torque (square-of-speed) applications, Class F Insulation, Class B Temperature Rise, based on 40 °C ambient temperature or 25 °C inlet water temperature.
- For constant torque applications and/or constant power contact ASIRobicon
- Motor voltage to be agreed with ASIRobicon
- Table applies to machines equipped with conventional Oil Lube Bearings (not magnetic). For magnetic bearing machines contact ASIRobicon
- High Speed Generators are available for special purpose applications. For rating information contact ASIRobicon
